Summary

- Taliawebs-Electronics Payments Area

Taliawebs-Electronics Payments Area

- Taliawebs-Electronics Payments Area is a web framework-based app which permits to be payed in digital. The app is made by two parts:
 - The booking page which permits to book a service, to send an email to the administrator with the information about the customer and the choosed service in compliance to the GDPR/EU n. 2016/679;
 - the epayment page where the customer can pay the choosed service by the Paypal technology in three modes: debit/credit cards of several banks and international bank circuits, Mybank (<https://mybank.eu/>), Sofort banking a Multisafepay company (<https://www.multisafepay.com>), Paypal bank account (<https://www.paypal.com/>).
- The Web App can be customized for the websites, CMS and integrated in them. It's not advisable for e-commerce platforms, because the e-commerce are provided by an internal system of booking and payment, based on the Paypal technology or similar as well. The web app has been tested in collaboration with the Merchant Team of Paypal (<https://www.paypal.com/au/webapps/mpp/merchant>).

Taliawebs-Electronics Payments Area HMI

The image displays two screenshots of the Taliawebs Electronics Payments Area HMI. The top screenshot shows a registration form with the following fields: "Type of service*" (dropdown menu), "Sender email address*" (text input), "Name and Surname*" (text input), and "Text*" (text input). A "submit" button is located below the form. The bottom screenshot shows a payment selection screen with the following options: "Pay with PayPal" (yellow button), "Pay with Sofort" (white button), "Pay with MyBank" (white button), and "Debit or Credit Card" (dark grey button). Both screenshots include a footer with the text "Copyright©2012/2020-Massimo Talla".
